

## Requirements for obtaining credit

### **Attendance**

The attendance at the practical training sessions is obligatory. A **single absence** is allowed provided an apology is given. Should a student be absent from two or more practical training sessions, sick note or explanation of other serious circumstances is required. In any case of absence from **three or more practical training sessions**, the student will undergo an oral examination at the end of semester focused on the topics of missed sessions.

### **Tests**

Three tests are administered within the course of practical training in a given semester. **In order to obtain credit, it is necessary in each of the three tests to reach a score equal to or higher than a set threshold.** The minimum score needed for successful completion of each test will be announced in advance. **Each test may be administered up to three times to a single student.** Apart from the regular terms of test administration during the winter semester, two terms during the winter exam period and one term in August will be made available.

### **Protocols**

In case protocols form an integral part of a practical training, their completion is an additional condition for obtaining the credit.
